DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: It is agreed that the prior art of record fail to teach or suggest, alone or in combination, the following limitations "selectively changing (controlling) at least one of a volume and a location (position) of the conductive fluid contained in at least one cavity having a fixed position for dynamically modifying at least one electrical characteristic of the electromagnetic horn antenna" in a manner claimed in claims 1 and 10; "wherein the selectively changing step further comprises changing a flare angle of the horn antenna" as claimed in claim 4; " wherein the selectively changing step further comprises changing at least a corrugation geometry of the horn antenna" as claimed in claim 6; "wherein the control system controls the volume of the conductive fluid to change a flare angle of the horn antenna" as claimed in claim 17; "wherein the control system controls the conductive fluid to change at least a corrugation geometry of the horn antenna" as claimed in claim 19; and "wherein the control system controls the conductive fluid to convert an inner conductive surface of the horn antenna from a smooth profile to a corrugated profile" as claimed in claim 21. It is for these reasons in combination with all the other limitations in the independent claims 1, 4, 6, 10, 17, 19 and 21, that claims 1-21 are allowable over prior art of record.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
